A NUTACIULERS OF PLATFORM SCALES,
A STATEMENT E of twenty years has enabled in to the public for the liberal patronage hitherto exceptions of Compound Balances, even when constructed upon correct mathematical principles. These defects can only be known and remedied by long experience and great practicalised. Platform balances, which is an inexperienced observer, appear to be exact imitations of our Scales, are often found when tested to be very imaginable convenience.

A great variety of PLATFORM BALANCES are under the laptor for correct weight. In many instances they will not agree with themselves. Merchants who have used them for months, supposing them correct, have includingly discovered that a heavy load, when divided and weighed in small drafes, would vary essentially, in the aggregate, from what was indicated by the same scale when weighed at once. Prequently the same platform will give different weights upon every chance of the position of the body weighed. Thus consequences of these variations are often vexistions, and always involve one partylu potuniary loss.

Certificate of the Impasions of Weights and Sessures in the care. The street is the position of the body weighed of the content of the position of the body weighed. Thus consequences of these variations are often vexistions, and always involve one partylu potuniary loss.

SATURDAY, NOVEMBER 27, 1852

The editor of the Journal can't see why we have not the right to purchase, or even to couquer Cuba-the same right we have exercised in other cases. The editor might see, if he would try the difference between a mountain and a Tho estacombs and monuments of kings and croco mole hill. We have never taken an organized community either by conquest or purchase.

We acquired areas of land, inhabited chiefly And visit ruin'd Jericho, where the anciby savage hundes, with here and there a civilized man. Neither Louisiana, nor Florida, nor California, are exceptions. 'The pettifogger may indeed raise a question as to how many inhabitants try; but the common sense of mankind will sel dom be puzzled with a question of the sort We may acquire Cuba as we cid Texas, by the voluntary offer of the people, but in no other way. Suppose we made a contract with Spain, and paid her \$100,000,010 for Cuba, and the people of the Pd roam all over Gaillee, its mountains, hills and Island should meet us with the remons'r nee that that they did not agree; that to them belonged the sovereignty of the Island, and that they precountry, what reply would we have to make?-According to our own political creed, we would have none at all. We should have to accede to the justice of the remonstrance, and abandon our purchase. We must stultify ourselves if we did otherwise.

As to the right of conquest, we have no place for it in our creed. We don't see how this Uni on is to hold a subjugated province, without exposing itself to the scorn and derision of the world for false professions.

To be sure, we could hold Cuba by purchase or conquest, against the rest of mankind The law of natious-that precious code, made for robbers -would justify us against other nations; but we can't commit suicide, by acting on principles subversive of the whole republican creed

Let all the world know that we neither buy no conquer communities of freemen If they want to join the stars and stripes, it must be their own voluntary act. In this consists the expansive nower of this Union. Communities enter this niou to gain, not to lose their freedom; to take their stand as sovereign States, not subjugated provinces. We are upbraided for cherishing a lust of compuest and dominion; why not other communities be upbraided for desiring a place among the States of the Union?

What we may do with Cuba, in case of war with Spain, an event not improbable, is another matter. As long as war may continue, self defence makes law in the case; but the ultimate destiny of Cuba under our influence, mas: be determined by her own people.

The London Tunes, of the 14 h inst., has s rather noticeable leading article. It commences ty s'ating that, owing to the "blunders" of the whigh, the "undignilled" conduct of Gen. Scott, and the "Jiscreditable attempts" of Mr. Webster, it never entertained a doubt of the success of Pierce. It rejoices that "General and liberty of trade;" praises Mr. Fillmore as possessing neither the passions nor the enthusiesm of his fellow citiz ms; -next states, finally, it be for Japan, that it is insufficient, and that the l'resident's letter will be read with astonishment and resented as an indignity." "The truth is," says the Times, "the American Cabinet is prepared to deal with the coal fields of Japan, just as it attempted to deal with the guano of Lobos, and there is no defence against such a policy but the possession of su-

The mighty one, wasse massive thought could sway
A shriving hemisphere; on whose strong arm
A main beared; who at her heim, settine
Of wheeling skins, could guide the ship aright,
From whose both, burning cloquence wenterth
Winged, arrowy truth, sped to earn's faitnest bound,
And bouring high for centures to owned.
No word of triumph for a bigs, career
Touching its giorious goal. No gaaree thrown back
O'er fields of toil, with neble cromies shown,
Heaped with great deeds—a menumentupreared
Where to the gaze of minious proudly turns!
No hearkening for the vance that, gathering then
From the Atantic and Partic shores.
Went up in grief and blessing!

Went up in grief and bie-sing!
Nought but this—
'Forgive my shas.''—Ah, what was earthly fame
To him on whom the light of purity
Eternal shone? What memories of high deeds
On the drear verge of judgment, where alone
Avails the plea—''For Jesus' sake?''
Lol here,
